

PSM2 assignment - dataset

1-on-1 feedback form

INFORMATION ON THE DATASET

This document details the variables of the dataset you will use for your assessment.

Note that this is the pseudo-dataset that differs in size and values from the full dataset that we will release after you have preregistered your analyses.

While the pseudo-dataset is identical for all students, the full dataset is different for each student and will be shared with each student individually.

The dataset contains 9 variables of offenders who were charged with crimes resulting from gang activity.

Variable code book:

- “id” -> a running case ID number
 - “age_offender” -> the age in years of the offender at the date of the offense
 - “family_income_before” -> the total annual family income of the offender’s household at the time of the offense
 - “gender_offender” -> the offender’s gender
 - “punishment” -> the punishment received after court hearings
 - “domestic_abuse_victim” -> whether the offender was victim of domestic abuse before committing the offense
 - “family_situation” -> the family situation at the time of the offense
 - “mental_health” -> whether there were any reported previous mental health issues of the offender at the time of the offense
 - “family_income_after” -> the total annual family income of the offender’s household in a second measurement 5 years after the offense
 - “offender_has_job” -> whether or not the offender has found a job at the time of the second measurement 5 years after the offense
-
